API Specification

 <https://67eca027aa794fb3222e43e2.mockapi.io/members>

Methods	URL Endpoints	Descriptions
GET	/members	Get a list of members
GET	/members/:memberId	Get a member by ID
POST	/members	Create a new member
PUT	/members/:memberId	Update a member by ID
DELETE	/members/:memberId	Delete a member by ID

Before you submit:

- ❑ Check that you have a markdown file named **my-understanding.md** written in your own words.
- ❑ Use this file to explain your **technical design decisions** for example,
 - ❑ explain how and why you divided the app's UI into components,
 - ❑ what state variables did you created and why?,
 - ❑ How did you manage these states? Was it via Passing Props or React Context, why?
 - ❑ Explain how and why you used the useEffect hook?
 - ❑ Explain whether you could and why, you would use fetch() without using useEffect?
 - ❑ Explain whether the use of fetch() should be synchronous or asynchronous JavaScript, why?
 - ❑ Include any other notes about React and Frontend Web Development you want to summarize your understanding of this technical domain . You can also note down questions you have.
 - ❑ Lastly, submit your repo url here and indicate your reliance on AI code generation (0-5)

AI Use Reflection Scale: How much did AI help you build this?

0 = No AI use

I did not use AI to generate code, explain concepts, debug, or teach me.

1 = AI used only for learning

I did not use AI to generate code, but I used AI to explain concepts, clarify errors, or guide my understanding.

2 = Mixed coding with AI support

I wrote some code myself and used some AI-generated code. I also used AI to help me understand, debug, or improve my solution.

3 = Learned from AI-generated code, then coded myself

AI generated example code or guidance, but I used that understanding to write or adapt the final code myself.

4 = AI generated the code, but I fully understand it

AI generated most or all of the code, but I can explain how it works, why it works, and how the main parts connect.

5 = AI generated the code with limited understanding

AI generated most or all of the code, and I cannot confidently explain how or why everything works.
